THE JOY OF THE SEARCH FOR KNOWLEDGE

A Tribute to Professor Dan Tsui

edited by Cheuk-Yin Wong (Oak Ridge Nat'l Lab.), James Shui-ip Lo (Brookdale Univ. Hospital & Medical Ctr., Brooklyn) & Shui-Yin Lo (American Tech. Group, California)

This invaluable collection of essays pays tribute to Dan Tsui, 1998 Nobel laureate in Physics. It paints a portrait of his outstanding personal attributes through the eyes of his friends and relatives. In addition, it provides a record of the environment which accompanied him in his search for knowledge. This book, capturing Dan Tsui's experience and joy of the search for knowledge, will inspire scholars of all ages.

Readership: Researchers and students in physics, and general readers.

REGRESSION AND TIME SERIES MODEL SELECTION

by Allan D R McQuarrie (North Dakota State Univ.) & Chih-Ling Tsai (Univ. of California, Davis)

This important book describes procedures for selecting a model from a large set of competing statistical models. It includes model selection techniques for univariate and multivariate regression models, univariate and multivariate autoregressive models, nonparametric (including wavelets) and semiparametric regression models, and quasi-likelihood and robust regression models. Information-based model selection criteria are discussed, and small sample and asymptotic properties are presented. The book also provides examples and large scale simulation studies comparing the performances of information-based model selection criteria, bootstrapping, and cross-validation selection methods over a wide range of models.

Readership: Statisticians, biostatisticians, applied mathematicians, engineers and economists.

CASE STUDIES IN TIME SERIES ANALYSIS

by Zhongjie Xie (Peking Univ.)

"... an excellent reference book for those who use time series modeling ... a welcome addition to the list of time series books already available in the market."

Sat Narain Gupta, *Mathematical Reviews*

This book is a monograph on case studies using time series analysis, which includes the main research works applied to practical projects by the author in the past 15 years. The works cover different problems in broad fields, such as: engineering, labour protection, astronomy, physiology, endocrinology, oil development, etc.

Readership: Mathematicians, researchers in probability, statistics and applied mathematics.

Advanced Series on Statistical Science and Applied Probability - Vol. 6

ELEMENTARY STOCHASTIC CALCULUS, WITH FINANCE IN VIEW

by Thomas Mikosch (University of Groningen)

Modelling with the Itô integral or stochastic differential equations has become increasingly important in various applied fields, including physics, biology, chemistry and finance. However, stochastic calculus is based on a deep mathematical theory.

This book gives an elementary introduction to that area of probability theory, without burdening the reader with a great deal of measure theory with applications taken from stochastic finance. In particular, the Black-Scholes option pricing formula is derived. The book can serve as a text for a course on stochastic calculus for non-mathematicians or as elementary reading material for anyone who wants to learn about Itô calculus and/or stochastic finance.

Readership: Economists, financial engineers, mathematicians and physicists.

224pp • Nov 1998 • 981-02-3543-7 • US\$34

ADVANCED SERIES ON STATISTICAL SCIENCE AND APPLIED PROBABILITY

Series editor: Ole E Barndorff-Nielsen

The Series comprises accounts, by leading experts, from those areas of statistical science and applied probability where advanced mathematical tools are essential. Both research monographs and textbooks are included, and the series promotes purely theoretical works as well as studies that combine theory and applications.

MATRIX ALGEBRA AND ITS APPLICATIONS TO STATISTICS AND ECONOMETRICS

by C Radhakrishna Rao (Pennsylvania State Univ., USA) & M Bhaskara Rao (North Dakota State Univ., USA)

Contents: Vector Spaces; Unitary and Euclidean Spaces; Linear Transformations and Matrices; Characteristics of Matrices; Factorization of Matrices; Operations on Matrices; Projectors and Idempotent Operators; Generalized Inverses; Majorization; Inequalities for Eigenvalues; Matrix Approximations; Optimization Problems in Statistics and Econometrics; Quadratic Subspaces; Inequalities with Applications in Statistics; Non-negative Matrices; Miscellaneous Complements.

Readership: Graduate students, researchers and scientists in biology, engineering and physics.

556pp • Jul 1998 • 981-02-3268-3 • US\$70

STATISTICS AND TRUTH

Putting Chance to Work

(2nd Edition)

by C Radhakrishna Rao (Penn. State Univ.)

"I am convinced that these lectures will be useful to a large public: to the young, who only know some techniques and who want to enlarge their thinking horizon, to the more mature, for whom some of the ideas they have acquired remained in a confused form."

Richard Tomassone, *Biometrics*

Contents: Uncertainty, Randomness and Creation of New Knowledge; Taming of Uncertainty — Evolution of Statistics; Principles and Strategies of Data Analysis; Cross Examination of Data; Weighted Distributions — Data with Built-in Bias; Statistics: An Inevitable Instrument in Search of Truth; Public Understanding of Statistics; Learning from Numbers.

Readership: Statisticians.

212pp • Aug 1997 • 981-02-3111-3 • US\$36

A NEW INTRODUCTION TO STOCHASTIC PROCESSES (In Chinese)

by Kai Lai Chung (Stanford Univ.) & Wu Rong (Nankai Univ.)

Beginning with a problem raised by the late Chinese mathematician Loo-Keng Hua, and the author's solution, this book discusses general Markov chains, a subject extremely popular in China in the fifties/sixties. The author emphasizes methodology like the first entrance and last exit decompositions, leading to the most beautiful results by Kolmogorov, Doebelin, and himself. This book contains many examples and exercises with hints and discussions.

Readership: Upper undergraduates in mathematics.

Procter & Gamble

The Asia R&D Organization of the Procter & Gamble Company has career opportunities for statisticians at the technical center in Kobe, Japan, to provide statistical support for world-class research and development in consumer products.

Responsibilities: The responsibilities are ranging from statistical consulting to data analysis and report writing. More specifically, the statisticians will be responsible for formulating research objectives into corresponding statistical hypotheses or models, developing and implementing study design, estimating variance and systematic errors, analyzing consumer research and lab data, writing reports and research papers collaboratively with other researchers.

Skills and Qualification:

- Ph.D in statistics or M.S. in statistics with 5+ years of industrial experience
- Solid theoretical training in experimental design and statistical modeling
- Excellent oral and written communication skills in English
- Some experience in SAS, S-Plus, or other computer languages

Preferred:

- Evidence of strong research capabilities, e.g., publication records
- Candidates with extensive applied experience are encouraged to apply
- Statistical consulting work in pharmaceutical industry or R&D organizations

How to Apply: Submit resume to

Junfang Li, Ph.D.

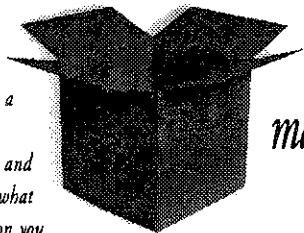

Procter & Gamble Far East

P.O. Box 5576

Cincinnati, OH 45241, USA

E-Mail: LLJ.2@PG.COM

Pack up
your
experience in a
brief
résumé and
tell us what
direction you
want your career to go.

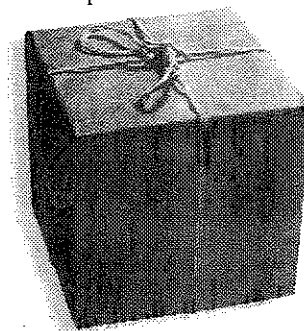

If you're trying to package your skills, send us your résumé and maybe ASG, Inc. can help you send your career in the right direction.

ASG, Inc. is a national contract consulting and research firm that's ranked as one of *INC.* magazine's 500

Fastest-Growing Private Companies. We specialize in Statistical Analysis, Biostatistics, Clinical Research, Relational Data Base Support, PC and Networking, SAS* Programming, Decision Support, Market Research, Data Management, as well as other Client Specified Needs. For over eight years we've been providing this support for the Pharmaceutical and Bio-Tech Industries. We've also been meeting the professional needs of the Health Care, Insurance, Financial, Communications, Information Technologies and Banking Industries.

We're looking for ✓ Statistical Programmers, ✓ Data Validation Experts, ✓ Biostatisticians, ✓ Senior Analysts, ✓ Consulting Statisticians, ✓ Clinical Systems Specialist, ✓ Data Management Specialists ✓ DBA's and ✓ Program Managers.

If you think that your skills fit into our kind of box, contact ASG, Inc. today and we'll tell you all about our package and the benefits and opportunities available with us.

*SAS is a registered trademark of SAS Institute Inc. in the USA and in other countries.

Offices in the Chicago, Los Angeles, New York City
and Research Triangle Park Areas.
